Secure STORAGE

OPTIONS FOR INFECTION CONTROL

LogiQuip® offers a variety of secure storage options focused on infection control and high-density storage. These products can be used across your facility and many are available through our **Rapid Ship Program**.

PAR CARTS

Par Carts are great for transport and high-density storage such as PPE, fluids and more. LogiQuip Par Carts can be upgraded to include a key lock or push-button lock.

LOGICELL CARTS

Available in a variety sizes, LogiCell Carts are ideal for new procedural areas and storage of important items that should be access controlled. Available with key lock or keyless lock for easy access.

SECURITY UNITS

Fully enclosed security units that lock are excellent storage options for controlled access to items such as PPE, ventilators and more.

QT CARTS

QT Treatment Carts are designed for general application or specialty applications such as Emergency Carts or Isolation Carts. Many locking options are available. All carts come standard with a key lock.

CART COVERS

Traditional Cart Covers and disposable cart covers are available for fast delivery through our **Rapid Ship Program**.
