Par Stor® Mobile Shelving Units

DESCRIPTION

Starter Unit is a complete mobile shelving system. An Add-On unit must be attached to a complete unit. The height is 74 to the top of the frame, but 76.5" including the lip of the top wire shelf. Shelving units should be limited to rolling within the immediate area, such as for ease of cleaning.

NOTES

These units are not intended to be interdepartmentally moved. Accessories are mounted with full-extension slides which are fully adjustable without tools to fit the frame's vertical slots. Slanted slides can slant up to 4 slots. All units include 4 cross bars, a wire top shelf and a bottom dust shield. Units are shipped knocked down but can be assembled upon request.

LogiQuip has been providing healthcare storage solutions to hospitals across North America Since 1992. Building on their combined 90 years of experience, our founders built a knowledgeable and experienced team who understand that each hospital's inventory, supply, and storage requirements are similar in theory, yet diverse in practice and application. Our sole focus is hospital storage and distribution systems and our mission is to provide our customers with products and ROI justified solutions tailored to meet their specific needs. Whether the prescribed solution is a single cart or a complete high-density storage solution, LogiQuip's expertise and extensive product line complement any supply chain solution.
