

# Robotic ARM STORAGE TRAY

## LOGICELL® STORAGE CARTS

Robotic Surgery provides many benefits to the patient, but it comes at a cost. Many **Robotic Instruments** and **Accessories** are expensive and have limited lifespans making proper storage imperative in protecting your patients and your investment. LogiQuip's **NEW LogiCell Robotic Arm Storage Tray** provides a safe and flexible way to store **Robotic Arms**.

### NEW ROBOTIC ARM STORAGE TRAY

Our **NEW LogiCell Robotic Arm Storage Tray** consists of a **Shelf Insert** and five (5) **Adjustable Dividers** that fit into our painted steel **Shelving** giving you 33" of length to safely store **Robotic Arms**. The **Insert** and **Dividers** can be ordered as a package (2436SHCD54) OR, you can order the parts individually. These are compatible with the 2436SHC-3.

### LOGICELL WALL PANELS

LogiCell Carts provide a unique **Cell Panel** along the inside walls of the **Carts** that significantly increase storage capacity. **Bins**, **Wire Baskets**, and **Shelves** can be placed straight in or at an angle making the **LogiCell System** incredibly flexible and efficient.

### ADDITIONAL ACCESSORIES

LogiCell Carts are fully customizable. In addition to **Bins**, **Wire Baskets**, and **Shelves**, additional **Accessories** such as **Catheter Slides**, **Stainless Steel Drawers**, and **Lockable Drawers** can also be added to your **LogiCell Cart** to meet your specific needs.

### SECURITY OPTIONS

LogiCell Carts and **Storage Cabinets** are available with **Tambour** or **Tempered Glass Hinged Doors**. Choose from **Key Lock** or **eLock** (Electronic Keyless Lock) for controlled access supplies. **RFID** access is also available for hands-free access (custom orders).
